

Third Party Logistics (3PL)

Take warehouse efficiency to a new level with the MC9400/MC9450

Keeping up with the world's 24x7 economy isn't easy. Order and shipping volumes increase every day, along with delivery timeframes. E-commerce is creating new opportunities for warehousing and third-party logistics (3PL) providers. Everything needs to move faster — and with the MC9400/MC9450, it will.

The ultra-rugged MC9400/MC9450 mobile computer has what it takes to turn manual processes into efficient, automated operations, so you pick up the pace and achieve new productivity levels to meet the ever-increasing demand.

Move goods in, through and out of your warehouse faster and more efficiently with the MC9400/MC9450

Where can you put the MC9400/MC9450 to work in your operations?

Cross-docking

Ensure the efficient and accurate movement of goods, so drivers don't experience delays while making pickups and deliveries; keep customers happy by ensuring shipments are put on the right trailer in the correct order at the right time, every time

Picking

Enable workers to find the best route to each item, verify item accuracy on-the-spot and instantly update product inventory; increase order fulfillment without expanding your workforce

Receiving

Get real-time visibility from the moment inventory arrives in the warehouse; ensure accurate product identification, inspection of shipments for damage and efficient product placement in the warehouse

Put-away

Empower workers to safely and quickly put everything in its proper place; eliminate put-away errors to ensure flawless fulfillment

Turbo charge your warehouse operations with all the right features

The next evolution in the ultra-rugged MC9000 Series — now with more power, advanced scanning, Wi-Fi 6E and 5G

Cutting-edge features in the MC9400/MC9450 enable faster, more efficient workflows from dock to stock so you can meet the skyrocketing demands of today's 24x7 economy

-  **Next generation platform** 2.5x more processing power and 50% more RAM (Compared with MC9300) handles all your WMS, ERP and other apps simultaneously
-  **Extended range scanning** Capture barcodes in hand to over 100 ft./30.5 m away; indoors and outside; green laser aimer is up to 7x more visible than red
-  **Wi-Fi 6E** Quadruple the bandwidth and capacity, triple the speed and up to triple the available spectrum than Wi-Fi 5; boost productivity with instant application response times
-  **Private/Public 5G** Affordable, low latency wireless data connectivity for expansive outdoor and indoor environments; no more investment on access points; support public and private 5G simultaneously with dual SIM
-  **Virtually indestructible** Most rugged specs for maximum uptime; 12 ft./3.65 m drops to concrete; dust tight and waterproof
-  **No more lost devices** Easily track and find missing devices with optional BLE battery and Mobility DNA Device Tracker license
-  **High-res camera** Takes highly detailed photos, ideal for documenting incoming damaged shipments and more
-  **Process automation** Capture shipping container identification, license plates and more with the press of a button
-  **Instant collaboration** Push-to-talk and secure messaging with Workcloud Communication suite
-  **Identity Guardian** Biometric facial recognition gives workers easy device access for shared devices; faster access without typing and eliminates the risk of shared or compromised passwords
-  **Well-loved ergonomics** Gun-style design lets workers move and perform tasks more quickly, with more comfort
-  **Backwards compatibility** Use all the same accessories and chargers as Zebra-in replacements for the MC9300

A model for every environment

Standard model for general warehouse use

Non-invasive model for use when hazardous materials are present

Freezer model for freezers and outdoor winter weather

Make sure your mobility solution doesn't stop where your cold chain starts. A **heated touch panel** ensures continuous visibility during freezer operations and heavy condensing conditions. A **freezer-rated battery** gives cold chain workers battery power they can trust during the longest, coldest shifts. And the **heated scanner exit window** ensures reliable data capture as workers move in and out of freezer areas.
