transACTION© is an all-in-one tool to automate the bar code & RFID data collection function and eliminate time-consuming, manual tasks in your warehouse. transACTION offers:

- Custom Mobile Screens Using Your Terminology

- Label Designer and Report Generator

- Flexible Screens and Entry with Emphasis on Data Collection Efficiencies

- Rules-Based Transactions to Easily Control Workflows and Processes

- Dashboard to Monitor and Track Results

- Role Management with Appropriate Access to Applications and Systems

Control costs and improve worker productivity immediately with the ability to detect trends, recognize low inventory levels, develop on-time metrics, reduce shipping costs, and more. This software suite is fully customizable based on your business process requirements, but flexible enough to grow and change to keep pace with business demands.

Where's My Stuff?

That's what transACTION is built to answer. From the factory floor to the shipping dock, we help you track, trace and control your inventory, labor and assets.

When **transACTION** is placed in the hands of your workforce, your employees operate at the point-of-work, enabling them to work faster and more efficiently.

We make IT work.

With constant changes in technology, you need expert advice from a solution provider that helps you make informed decisions about **network solutions, equipment selection, security, the use of consumer devices and integration of hardware and software.** At Barcom, we are experts in barcode automation and RFID solutions. We keep worker productivity and systems operations performing at optimal levels to meet the needs of your growing organization. Our solutions enable workforce empowerment; from integrated voice-and-data communications to mobile printing, bringing your team to the point-of-work with access to real-time inventory and information they need to get the job done.

Inventory Control & Warehouse Management

Location management is a challenge. Real-time visibility allows you to accurately move product out the door, on time, every time.

- Receipts
- Moves
- Issues
- Adjustments
- Physical Inventory
- Cycle Counts

Generate inventory reports and create bar coded shipping and compliance labels in seconds. Customize modules you need most, including a mobile screen builder for mobile devices.

> "*Since implementing transACTION, RockTenn Retail Solutions has performed over 1.9 million picking operations with fewer than 200 pick errors or 99.999% pick accuracy.*"
>
> - M. Miller, Director IT

Asset Tracking

Maintain accurate inventory and information on your assets. Bar code labels track each asset, and a hand-held bar code scanner or mobile computer collects:

- Age
- Location
- Quantity
- Assigned User
- Service History
- Maintenance Due

Control labor hours and data entry errors, and maximize the life of your valuable property with a tracking module built to save you time and money.

Production Reporting

Maintaining awareness of the overall efficiency of your operation is difficult without proper reporting. Our production reporting module provides real-time data, allowing you to manage costs, productivity and quality alerts easily.

Shop Floor Control

Efficiency is achieved when equipment and process comes together. transACTION helps control and manage operations at the shop floor level, increasing the accuracy of data and productivity of your workers.

Label Printing and Compliance Labeling

Product identification labels are essential to meeting compliance requirements and improving operational efficiency; a proper labeling solution simplifies the process and ensures accuracy.

Labor Management Time & Attendance

Monitor time and attendance of workers and be better equipped to control costs, improve employee productivity and minimize risk. Automate pay and work rules to eliminate manual tracking of time cards, data entry and the approval process.

A BETTER WAY TO MANAGE INVENTORY, COSTS, QUALITY AND CUSTOMER SERVICE Automating paper-based tasks yield big savings. The return on investment (ROI) is fast with most operations realizing a return in less than 12 months. When data entry accuracy improves, so will costs and quality.

Barcom, Inc. specializes in warehouse, distribution and manufacturing automation solutions. **From the job site to the factory floor, we follow a solutions approach** by understanding your operating challenges and offering technology tools and infrastructure recommendations that improve productivity, increase profitability and accommodate growth along the way.

Call us today at 423-855-1822 or **email sales@barcominc.com** to arrange a site visit of your warehouse.
